Database

```
(base) PS D:\FILES\OFFICIAL\SEM 6\SE\PROJECT\Automated-Elective-Processing> docker pull mongo:latest
latest: Pulling from library/mongo
Digest: sha256:ad947856db716ddd0b9cc525e341c77208ed8dafcb4a6ad23f9b3addd7a4f71c
Status: Image is up to date for mongo:latest
docker.io/library/mongo:latest
```

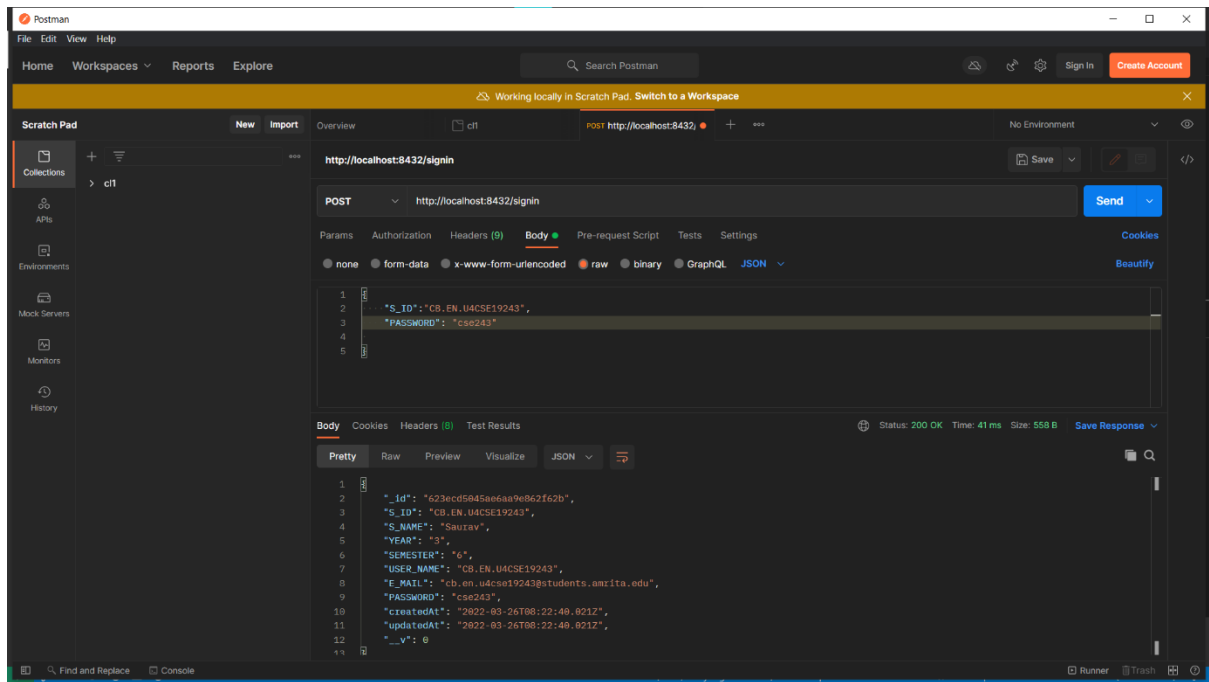

The screenshot shows the MongoDB Compass application interface. On the left, a sidebar lists the database structure, including a collection named 'students'. The main area displays the 'students' collection with 19 documents. The first three documents are visible:

- Document 1:**

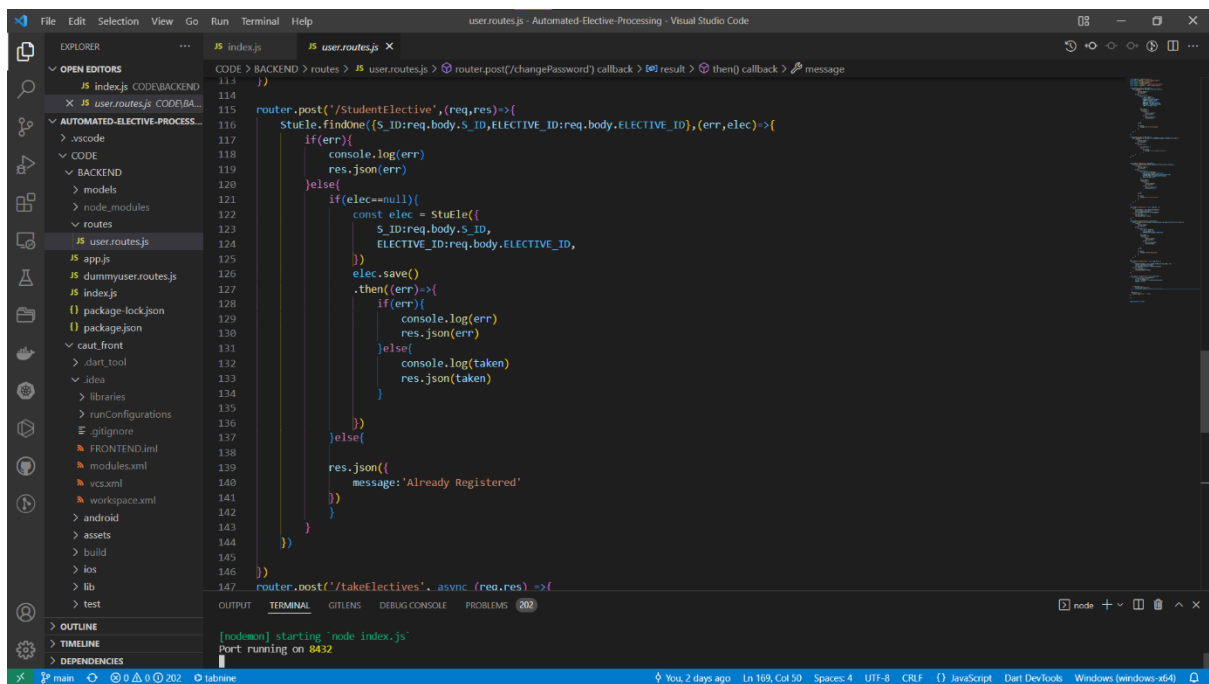

```

  "__v": 0
}
```

Backend:

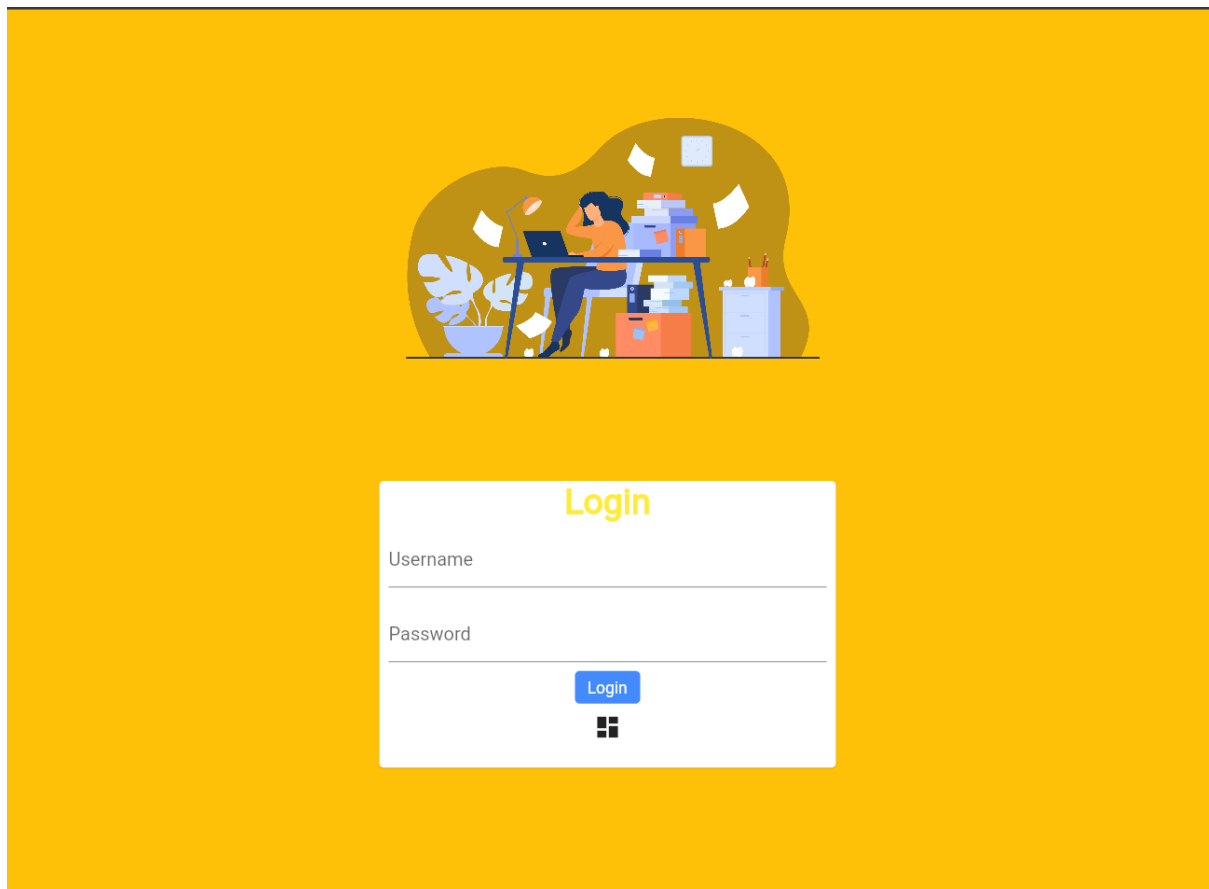

The screenshot shows the Visual Studio Code interface with the file explorer on the left and the code editor in the center. The file explorer shows a project structure with a 'models' directory containing several .model.js files, including 'student.model.js' which is selected. The code editor displays the content of 'student.model.js', which defines a Mongoose schema for a student model. The schema includes fields for 'S_ID', 'S_NAME', 'YEAR', 'SEMESTER', 'USER_NAME', 'E_MAIL', and 'PASSWORD', all of which are required strings. It also includes a 'timestamps' field. The terminal at the bottom shows the command 'node index.js' being executed, and the output indicates that the server is running on port 8432.

```
1 const mongoose = require('mongoose')
2
3
4
5 const studentSchema = new mongoose.Schema({
6   S_ID: {
7     type: String,
8     required: true,
9   },
10   S_NAME: {
11     type: String,
12     required: true
13   },
14   YEAR: {
15     type: String,
16     required: true
17   },
18   SEMESTER: {
19     type: String,
20     required: true
21   },
22   USER_NAME: {
23     type: String,
24     required: true
25   },
26   E_MAIL: {
27     type: String,
28     required: true
29   },
30   PASSWORD: {
31     type: String,
32     required: true
33   },
34   timestamps: true
35 })
```
